## BEFORE YOU DO ANYTHING...

Thank you for purchasing INposition 8.0, the only practical imposition solution designed specifically for QuarkXPress™ users. Please use one of the following procedures, whichever applies to your situation.

### Do you have an Evaluation Version?

If you ordered an Evaluation Version, your dongle can be activated for 30 days. The 30-day evaluation period is calculated from the date and time set on your workstation. If you use the evaluation dongle on more than one workstation, make sure that the date and time on all workstations correspond. Dynagram is not responsible for dongle malfunction or for a shortening or premature expiration of the 30-day evaluation period if the dongle is used on multiple workstations that are set to different dates or times. The Evaluation version is fully operational.

After 30 days, you will need to purchase the software. Please contact [sales@dynagram.com](mailto:sales@dynagram.com).

## FREE UPDATES

After installing your INposition, please make sure to log on to our website for the latest product updates.

## TECHNICAL SUPPORT

For technical support issues, please fill out the support form on our website at [www.dynagram.com/support/](http://www.dynagram.com/support/)

For immediate assistance, please contact:

**US and Canada\*** Tel.: (418) 266-1275  
Fax: (418) 694-2048  
Email: [support.inposition@dynagram.com](mailto:support.inposition@dynagram.com)

**Other Countries** Please contact your distributor or reseller.

\* A Service Agreement is available for customers in Canada and the United States. This convenient support package offers unlimited technical support (email and telephone). Contact your sales representative today for more information on this service.

## ACTIVATION STEPS

Before you can use INposition, your dongle must be activated. To obtain your activation code:

**US and Canada** Send an e-mail to [activation@dynagram.com](mailto:activation@dynagram.com) with your complete identification and dongle number.

**Other countries** Contact your reseller or distributor.

**Step 1:** Launch QuarkXPress. A message will inform you that the dongle must be activated.

**Step 2:** In the INposition menu, select Activation. Enter your code in the dialog box and click OK.

**Step 3:** Restart QuarkXPress to complete the activation.

## START ON THE RIGHT FOOT

To start your training on INposition, see the User Manual in the Docs folder. The manual includes a short tutorial with step-by-step exercises.

The complete User Manual is also available in the Help menu with all hypertext links.

## Are you exchanging your Dongle?

Previous INposition ADB dongles are not supported in OS X environment. If you have already purchased INposition but are only changing your dongle type (from ADB to USB), please complete and fax the Product dongle exchange form included in this package and return the original copy along with your old dongle within 15 days of the shipment date. You will find all details on the form.

A permanent activation code will be provided upon receipt of your old dongle. Meanwhile, your new dongle can be activated using a temporary Evaluation code. Simply type "EVAL" in the Activation dialog box (see Activation steps). The Evaluation version will be fully operational for 30 days.

## INSTALLATION INFORMATION

### Installing INposition for the first time (Standard or Evaluation version)

Follow Installation steps 2 to 4, then Activation steps 1 to 3 as explained in the following sections.

If you ordered an Evaluation version, your dongle can be activated for 30 days by simply typing "EVAL" in the Activation dialog box (see Activation steps). The Evaluation version is fully operational.

## Upgrading from v. 2.5.4 or less to v. 8.0

Your older INposition dongle is obsolete. Please complete and fax the Product dongle exchange form included in this package and return the original copy along with your old dongle within 15 days of the shipment date. You will find all details on the form.

A permanent activation code will be provided upon receipt of your obsolete dongle. Meanwhile, your new dongle can be activated using a temporary Evaluation code. Simply type "EVAL" in the Activation dialog box. The Evaluation version will be fully operational for 30 days.

Follow all of the Installation and Activation steps as explained in the following sections.

## Upgrading from v. 2.5.5+ to v. 8.0

The dongle provided with version 2.5.5+ has upgrade capabilities for the version 8.0 (compatible with QuarkXPress 8.x).

Follow Installation steps 3 and 4, then Activation steps 1 to 3 as explained in the following sections.

More complete procedures can be found in section 2.2 of the User Manual (see PDF file on the enclosed INposition CD).

## INSTALLATION STEPS

- Step 1:** Quit QuarkXPress, shut down your computer and remove the old INposition dongle.
- Step 2:** Attach the new dongle to any USB port of your computer.
- Step 3:** Start up your computer if necessary.
- Step 4:** Insert the INposition CD and double-click the Installer icon. The workstation administrator's password will be required to run the installation. Follow the instructions on screen to complete the installation. At the end of the process, you may be prompted to reboot your computer.

**IMPORTANT:** The installation of INposition on Mac OS X will prevent the use of the dongle in Classic mode. Before re-using your previous version of INposition on the same computer (by launching QuarkXPress 4.1 or 5), you must close QuarkXPress and run the "DongleDriver\_Non\_Exclusive" utility file on the CD to revert the dongle driver to Classic mode. To use INposition back again, run the "DongleDriver\_OSX\_ Exclusive" installation which will ensure the dongle compatibility with OS X environment. More info about dongle drivers can be found in the Release Notes.
